Researcher position

At the Computational Chemistry Group the University of Porto

The group specializes on the application of quantum mechanical calculations and molecular simulation to interfaces and reactive systems with topics like heterogeneous catalysis and biosensors (Prof. J.A.N.F. Gomes/ Prof. M.N.D.S. Cordeiro) as well as computational enzymatic catalysis and drug design (Prof. M.J. Ramos).

The candidate should have experience in computational chemistry (preferentially MD/MC simulations or/and periodic DFT calculations) and be ready to start at the beginning of 2008.

The position is scheduled for one year with possibility of contract extension to four more years.

The salary is around 2100€/month after taxes, including health insurance.
